Exploring generative-AI in the legal practice: Who owns the output?

Legal perspectives on IP protection for content generated with artificial intelligence.

AI is reshaping the legal landscape as we know it. Join us as we explore artificial intelligence (AI) in the context of intellectual property (IP) protection. We will discuss issues in inventorship and copyright authorship of AI-generated content and its ownership and protectability within the framework of IP law. During interactive breakout sessions you'll get the opportunity to hear from your peers about their experiences with IP issues, and how they are—or could be—using AI in their practice.

For legal practitioners seeking to stay ahead in a rapidly evolving field, this session is a must-watch.

Engage in insightful discussions, gain practical strategies, and network with your INBLF NextGen peers.

Register now to secure your spot!
